

Lab 04

Literature Review & Proposal Worksheet!!

Instructions

Step #1: Write each portion of the review & proposal into the space provided – use sentences and paragraphs !!!

Step #2: On separate pages below, compose the content into a properly formatted APA research report.

The gray sections do not need to be filled out!!! Gray sections are for grading purposes only.

Table 1

Content	Points	Type the content of that section...
Title Page	10 total	APA style title page for YOUR paper
Title	2	
Author(s)	4	
Affiliation	2	
Course number & name	2	PSYC 350 Laboratory
Body (Introduction)	22 total	Your paper starts on a new page. There is no header for "Introduction", you just have your title (formatted) and then begin writing.
Title	2	
Introductory paragraph telling the purpose and scope of review	20	
Lynn & Mynier Article	111 total	Summary & Integration of article
Subheading	2	
Appropriate in-text citation	3	
Study 1		
What is the purpose of the research being reported?	4	
What is the specific research question or research hypothesis?	5	
How was the research conducted?		
a) who were the participants?	4	
b) what type of research design was used?	4	
c) what equipment and/or materials were used?	4	
d) what treatment & data collection procedures were used?	4	
e) What are the results of the statistical analysis of the data as they relate to the research question or research hypothesis? Make sure to include ALL results.	8	
f) How did the author(s) relate this new finding to past knowledge?	8

hypothesis? Make sure to include ALL results.		
f) How did the author(s) relate this new finding to past knowledge?	8	
Integration of the 2 articles	42 total	
Subheading	2	
How were the findings of the 2 articles similar?	10	
How were the findings of the 2 articles different?	15	
What do we know from the findings of 2 articles that we don't know from either alone?	15	
Proposed Research	92 total	
Subheading	2	
Quality (complexity, interestingness, potential value) of proposal	50	Note: "Easy proposals" (e.g., same study with a different population or in a different situation) are worth much less much than "more complex proposals" (e.g., combining two findings to predict a third).
Purpose of the proposed research	5	
Research question or research hypothesis	10	
Sample that will be used (description and number)	5	
Research materials (stimuli, apparatus, psychological tests, etc.)	10	
Procedures (what the participants did that produced the data) that will be used.	10	
References	12 total	
Heading	2	
Format of Entries	10	
Format & Writing	21 total	
Double-spaced / correct formatting	5	
Sections in the correct order	6	
Misc. Errors including grammar, spelling, incorrect referencing of articles, incorrect punctuation, etc.	10
