

Lab 09: Project Analysis Proposal

Data, Research Hypotheses, Analyses & References

Variable Selection and Recoding (20 points + bonus)

Instructions

Because we have only learned 2-group ANOVA, we will need to take any of our qualitative variables that have more than 2 groups, and recode them to be only 2 groups. How you choose to do this has some important implications for your research hypotheses and your references. For example, when we talked about ethnicity and gender earlier in the course, we focused on how lumping people together can influence both the results and how we interpret them. Work with your TA to talk about what makes sense for your set of references and research hypotheses.

Note: Any qualitative variable with 3 or more groups must be selected and/or recoded into 2 groups.

Data set you will use: _____
Table 1

Variable	Name	For each variable below, highlight one of the following: (Quantitative, 2-groups, 3+ groups → 2-groups)
Core variable		Quantitative / 2-groups / 3+ groups → 2-groups
Variable #1		Quantitative / 2-groups / 3+ groups → 2-groups
Variable #2		Quantitative / 2-groups / 3+ groups → 2-groups
Variable #3		Quantitative / 2-groups / 3+ groups → 2-groups
Variable #4		Quantitative / 2-groups / 3+ groups → 2-groups
Variable #5 (bonus)		Quantitative / 2-groups / 3+ groups → 2-groups
Variable #6 (bonus)		Quantitative / 2-groups / 3+ groups → 2-groups

Research Hypotheses (20 points + bonus)

Instructions

For each Research Hypothesis, identify the following information:

What kinds of variables (select one): 2 quant variables OR 2 qual variables OR 1 of each type

Statistic you'll use (select one): 2BG ANOVA OR 2WG ANOVA OR r OR $2 \times 2 \chi^2$

State RH below: Use handouts and appropriate terms for each statistic

RH #1: Relationship between Core Variable and Variable #1

What kinds of variables:

Statistic you'll use:

State RH:

RH #2: Relationship between Core Variable and Variable #2

What kinds of variables:

Statistic you'll use:

State RH:

RH #3: Relationship between Core Variable and Variable #3

What kinds of variables:

Statistic you'll use:

State RH:

RH #4: Relationship between Core Variable and Variable #4

What kinds of variables:

Statistic you'll use:

State RH:

RH Bonus #1: Relationship between Core Variable and Variable #5

What kinds of variables:

Statistic you'll use:

State RH:

RH Bonus #2: Relationship between Core Variable and Variable #6

What kinds of variables:

Statistic you'll use:

State RH:

References (30 points)

Instructions

For the final project, you will need to critically read at least three peer-reviewed journal articles and synthesize their findings into a well-structured literature review that tells a story about your core variable.

Reference #1

Complete the research article summary table below.

Table 2

Research Article Summary Component	Your notes
Proper in-text citation (lastname, YYYY)	
Purpose or Research Question	
Target Population & Data Sample	
Research Design & Procedures	
Variables Used (IV(s) & DV(s) or Controls)	
Major findings (key results only)	
How is this relevant to the variables of interest you selected for your research project? (a few sentences or bullet points is fine!)	

Reference #2

Complete the research article summary table below.

Table 3

Research Article Summary Component	Your notes
Proper in-text citation (lastname, YYYY)	
Purpose or Research Question	
Target Population & Data Sample	
Research Design & Procedures	
Variables Used (IV(s) & DV(s) or Controls)	
Major findings (key results only)	
How is this relevant to the variables of interest you selected for your research project? (a few sentences or bullet points is fine!)	

Reference #3

Complete the research article summary table below.

Table 4

Research Article Summary Component	Your notes
Proper in-text citation (lastname, YYYY)	
Purpose or Research Question	
Target Population & Data Sample	
Research Design & Procedures	
Variables Used (IV(s) & DV(s) or Controls)	
Major findings (key results only)	
How is this relevant to the variables of interest you selected for your research project? (a few sentences or bullet points is fine!)
