Methods of the Self-Description Questionnaire

Participants

- university undergraduate students from UNL (traditional and nontraditional)
- sample size (N)
- average age
- sex or gender identification (% each category)
- ethnic/racial (% each category)
- friends and associates of students enrolled in an introductory stats course
- students also completed one survey each
- collected from other students in classes, dorm, frat/sorority house, apartment, etc. (wherever they were at the time)
- no informed consent provided at the top of the questionnaire

Materials

- completed a self-report questionnaire
- completed it in a natural setting
- demographic questions (age, gender, race, etc.)
- description of TIPI, MAAS, RSE, RFQ, etc. however, you will only describe the surveys used in your analyses. Be sure to mention that participants did complete a set of surveys, but only some were used in the analyses.

Procedure

- investigators completed one survey themselves first
- each student researcher sought out 5 other undergraduate students, regardless of age, to complete a survey
- scored and collated surveys
- entered into a larger database that consisted of data from multiple stats lab sections
- formulated hypotheses and completed appropriate analyses
